Summary of Position: QSI's Jr.Net Developer is responsible for producing code using .net languages such as C# and VB. This position creates applications from scratch, configure existing systems and provide user support, and write functional code.

Responsibilities for a Jr.Net Developer

- Write clean, scalable code using .NET programming languages.
- Remain up to date with the terminology, concepts and best practices for coding mobile apps.
- Develop technical interfaces, specifications, and architecture.
- Use and adapt existing web applications for apps.
- Create and test software prototypes.
- Develop client displays and user interfaces.
- Assist software personnel in handling project related work and other requirements.
- Coordinate with other software professionals and developers.

Qualifications for Jr.Net Developer

- Familiarity with the ASP.NET framework, SQL Server and design/architectural patterns (e.g. Model-View-Controller (MVC)).
- 1-3 years of development experience using C# .NET.
- Knowledge of at least one of the .NET languages (e.g. C#, Visual Basic .NET) and HTML5/CSS3.
- Familiarity with architecture styles/APIs (REST, RPC).
- Understanding of [cloud/service-oriented architectures preferred](#).
- Must be a U.S. Citizen and have the ability to obtain/maintain a government security clearance.
