RELIABILITY DATABOOK SERIES

Failure rate data for more than 100,000 electronic and electromechanical parts and assemblies.

Electronic Parts Reliability Data (EPRD-2024)

PART DESCRIPTIONS

What is EPRD?

The Electronic Parts Reliability Data (EPRD) publication contains field failure rate data for commercial and military electronic components for use in reliability analyses.

Component types include integrated circuits, discrete semiconductors (diodes, transistors, optoelectronic devices), resistors, capacitors, and inductors/transformers. Data includes part descriptions, quality level, application environments, point estimates of failure rate, data sources, number of failures, total operating hours, miles, or cycles, and detailed part characteristics.

The EPRD database as well as other failure rate, mode and mechanism databases is accessible through a data-as-a-service titled ROADS.

How to Use This Document

The parts description document provides the parts/components that are listed in the FMD database. The list is alphabetized, to enable users to quickly find part(s). Alternatively, users can press Ctrl+F to enter a search term.

Note: If you do not see your specific component listed in the following pages, email Qinfo@Quanterion.com to reach a reliability engineer.

How is the Data Used?

Electronic Parts Reliability Data (EPRD) is used by engineers worldwide to:

- **Perform reliability analyses including:**
 - Mean Time Between Failure (MTBF)
 - Fault Tree Analysis (FTA)
 - Safety Analyses
 - And others
- **Assess reliability requirement feasibility**
- **Improve product and system reliability**
- **Build reliability into new designs**
- **Produce software for calculating reliability**
- **And perform other tasks**

How Can I Access the Data?

Access the reliability failure rate, mode, and mechanism data through an online subscription to ROADS, which stands for the Reliability Online Automated Databook System.

ROADS provides easy, online access to the Electronic Parts Reliability Data (EPRD), Nonelectronic Parts Reliability Data (NPRD), and Failure Mode/Mechanism Distributions (FMD) databooks.

GOLD HONOREE

Electronic Parts Reliability Data 2024 (EPRD-2024) contains 1.2 million field failure rate data records of commercial and military electronic components and assemblies for reliability analyses.

HARNESS THE POWER OF DATA FOR EFFECTIVE RELIABILITY ANALYSES.

Electronic Parts Reliability Data (EPRD)
is used by engineers worldwide to:

- Perform reliability analyses including:
 - Mean Time Between Failure (MTBF), Fault Tree Analysis (FTA), and Failure Mode Effects and Criticality Analysis (FMECA)
- Assess reliability requirement feasibility
- Improve product and system reliability
- Build reliability into new designs
- Produce software for calculating reliability
- And complete additional tasks

TAP INTO OUR EXPERTISE

Quanterion Solutions has been providing expert reliability consulting to help companies meet their reliability needs for decades. Projects are customized to match company needs and can range from one-time consultations to regular reliability work.

If you're a customer, we can:

- › Help you choose the "right" suppliers
- › Define reliability requirements to impose on suppliers
- › Assess the R&M of the products you produce

If you're a supplier, we can:

- › Help you understand your customers' needs
- › Define your company's approach to quality and reliability
- › Serve as an independent reliability function to assess the effectiveness of your policies and approaches at the organizational or product level
- › Analyze or evaluate your products' reliability
- › Solve reliability and quality-related product problems

These are just a few of the types of consulting we offer.

Data Agreements

Quanterion Solutions offers custom reliability data agreements to companies interested to integrate failure rate data into their systems and software.

Customers have been able to produce cutting-edge software for calculating product and system reliability with the use of our failure rate data.

Discuss a custom reliability data agreement for your organization by reaching out today to our reliability engineers at Qinfo@Quanterion.com.

ROADS

Reliability Online Automated Databook System

ROADS provides customized access to any or all of these Quanterion Databooks:

- Nonelectronic Parts Reliability Data (the latest NPRD-2023, NPRD-2016 and NPRD-2011)
- Electronic Parts Reliability Data (including the latest EPRD-2024 and EPRD-2014)
- Failure Modes / Mechanisms Distribution (including FMD-2016 and FMD-2011)

ROADS provides efficient search and retrieval of all information contained in the NPRD, EPRD, and FMD hard copy databooks. This interactive online tool can be accessed anywhere with an Internet connection. Users also gain access to NPRD, EPRD, and FMD updates.

NEED ACCESS FOR A TEAM?

ASK ABOUT THE ROADS ENTERPRISE SUBSCRIPTION.

WHAT IS A ROADS ENTERPRISE SUBSCRIPTION?

The ROADS Enterprise subscription is available for groups of 10 or more, and it enables group admins to easily manage their users and enjoy the benefits of an Enterprise subscription.

WHAT ARE THE BENEFITS OF ROADS ENTERPRISE?

- Lower cost overall due to a group quantity discount.
- Simplified renewal of your ROADS subscription.
- Easy management of end-users. Users can be easily added, removed, or have their access temporarily paused to free up a seat.
